---

Stefanie Bruinsma manages industry engagement for the University of Waterloo's Faculty of Engineering Research Office. Uniquely qualified as both a mechanical engineer and a licensed mechanic, she has over 15 years in industry practice.

Her experience includes managing powertrain dynamometer facilities, where Stefanie commissioned, launched and operated test cells for vehicles, motors, engines and batteries. Experienced in setting up numerous different test scenarios, she has worked on significant research projects with industry and advised Waterloo's undergraduate automotive student competition teams.

Currently registered with Professional Engineer's Ontario (PEO) as an Engineer-in-Training (EIT), Stefanie expects to receive her Professional designation in 2020. She also is currently pursuing a Master of Business Entrepreneurship and Technology (MBET).
