ICD.D, MBA

**Director-Smart City & Public
Safety**
TELUS

**Intelligent Transportation, Smart
Cities & Digital Transformation**
*A holistic approach to guiding
organizations into the future*

BOARD EXPERIENCE

Madison Community Services
ArtsPond

Daniel Kligerman is a technology-focused executive, known for intuitively understanding the most complex of business challenges, and asking deeply insightful questions to reveal future scenarios and potential risk. The voice of reason when tensions rise, Daniel's calm, optimistic demeanor, and ability to understand and articulate multiple perspectives make him the key ingredient to achieving consensus and building bridges. His extensive grasp of technology, digital transformation, and cybersecurity allow him to offer a holistic, strategic approach to guiding organizations into the future.

In his decades of experience in telecommunications and information technology, Daniel leads the Smart City portfolio at TELUS, and has spearheaded the development of an innovative and ambitious new strategy focused on Intelligent Transportation Solutions. In the past, he created a profitable external sales channel for a multi billion-dollar business from scratch within two years, successfully executed on a \$60M capital budget for new service development, and orchestrated a turnaround for a previously failing \$25M managed services program.

As a board member, Daniel served as Treasurer with Madison Community Services, providing vital supportive housing and recovery services to more than 900 at-risk members of the downtown Toronto community every year, with astounding results. He was also the chair of ArtsPond, a non-profit organization delivering innovative programs to the arts sector to ensure its continued economic viability and cultural impact.

Daniel holds the ICD.D accreditation from the ICD-Rotman Directors Education Program, and an MBA from the University of Victoria in Strategy and Leadership.
