

Rainbow Bridge Technical Tour

June 19 2018

1.30 pm – 3:30 pm

The Rainbow Bridge is an international border crossing that connects two popular tourist destinations, Niagara Falls, NY to Niagara Falls, ON. Over 1.2 million pedestrians and over 2.4 million vehicles cross this bridge annually making this one of the busiest connections on the Northern Border. Beyond the amazing view of both the American and Canadian Falls, this session will discuss the Border Wait Time system that has recently been installed and what that means to the Niagara corridor as a whole. We will also look at some of the various challenges at the border and what the future may look like.
